

Meeting 1 – In-Person Meeting

Project: Loan Approval Prediction Machine Learning

Course: SWE485 – Selected Dataset

Group: Group 3

Meeting Type: Face-to-Face Meeting

Phase: Phase 1

Date: February 12, 2026

Location: King Saud University

Attendees

- Hissah
- Latifa
- Roukaya
- Lamia
- Jana
- Leen
- Layan

Discussion

- Discussed the project idea and Phase 1 requirements.
- Reviewed the dataset conditions required by the course, including dataset size, number of features, classification classes, and structured tabular format.
- Compared several possible datasets and discussed their suitability for supervised learning tasks.
- Discussed potential machine learning models and expected performance for classification.
- Evaluated whether the datasets contained meaningful financial features that support loan approval prediction.

Outcomes

- Selected the "Loan Approval Prediction" dataset as the final dataset for the project.
- Confirmed that the dataset satisfies the course requirements and supports classification tasks.
- Distributed initial tasks among team members for Phase 1 work.

Meeting 2 – Online Meeting Minutes

Project: Loan Approval Prediction Machine Learning

Course: Model Selection for Best Performance

Group: Group 3

Meeting Type: Online Meeting

Platform: Google Meet / Zoom

Date: 31 March

Attendees

- Hissah, Latifa, Roukaya, Lamia, Jana, Leen, Layan

Discussion

- Compared different machine learning models based on performance metrics.
- Evaluated models using Accuracy, Precision, Recall, and F1-Score.
- Discussed results to determine the best-performing model.
- Verified the effectiveness of the selected model through testing.

Outcomes

- Identified Random Forest as the best-performing model.
- Confirmed its reliability based on evaluation results.
- Agreed to proceed with the selected model for final implementation.
-
